

## **PROJECT PROPOSAL**

### **Hypefive**

#### **MEMBERS:**

Cainday, Bradley C.  
Mentok, Almera G.  
Tapispisan, Yves John B.  
Ternal, April Joy A.  
Villa-Villa, Diana T.

**PrintBee**, a printing application designed to streamline the printing process. It aims to address common challenges such as manually transferring files from various sources like flash drives and emails, which often leads to cluttered file management.

**Target Users:** Printing Shops and Customers

#### **Features:**

- File Management
- Admin Dashboard
- Queue Management
- Inventory Management
- Document Upload and Selection
- Status Tracking
- QR Code printing

The application will provide two interfaces: one for printing shop admins and another for customers. Shop owners can easily manage files, monitor queues, and track inventory, while customers can upload documents and track their printing status effortlessly.
